

S-U2V Ground Mount

The most preferred medium to large solar farm

Time-saving Assembly

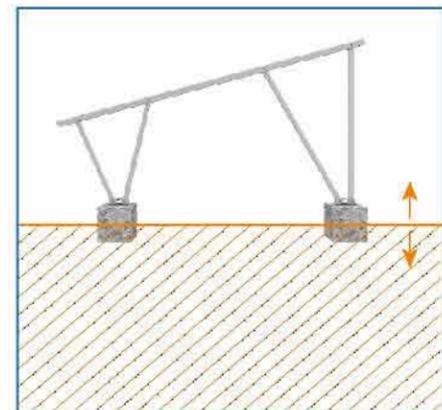

- No in field drilling, cutting or welding due to the highly prefabricated components.
- Pre-assembled V-rack on request.

Foundation

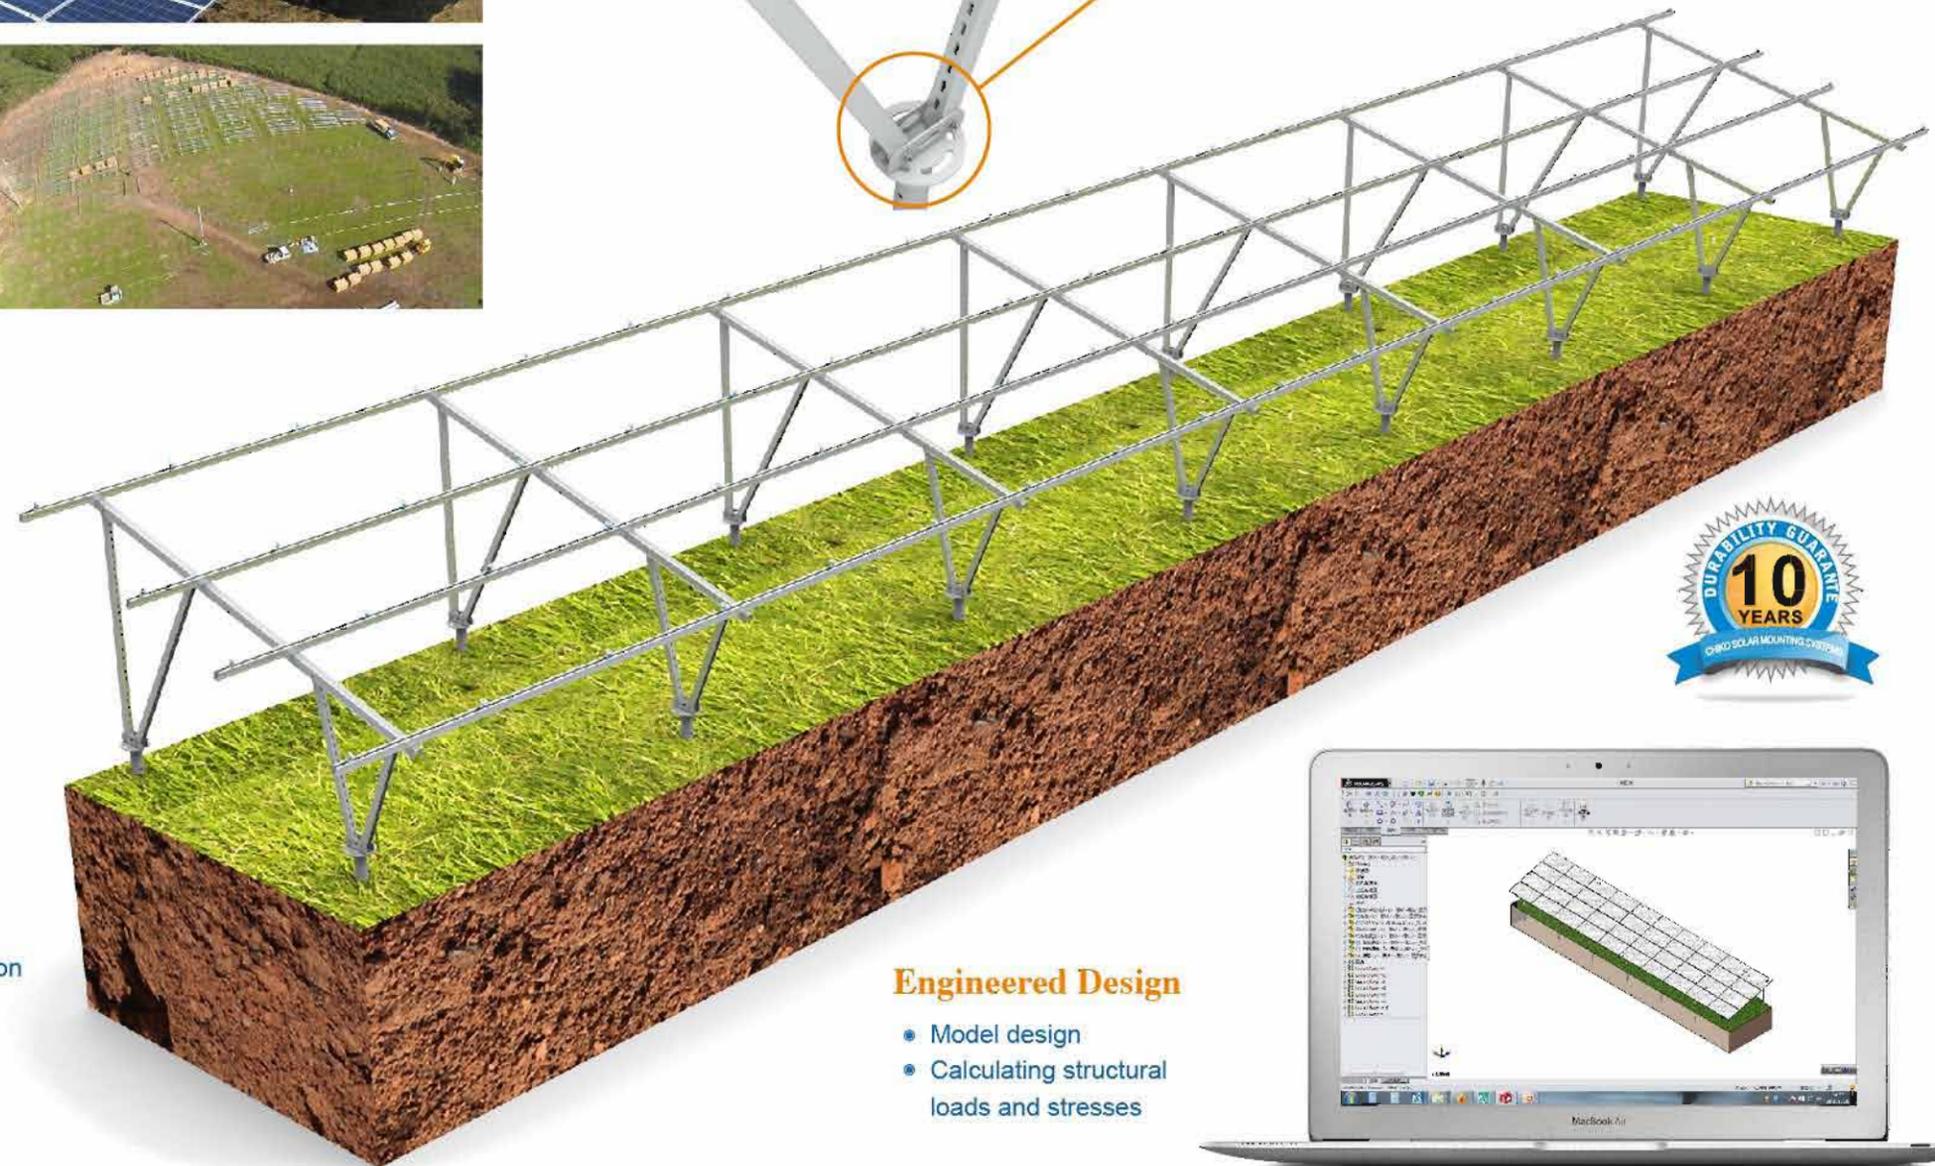

Screw piles

- High traction and pressure values.
- Installation by mini-digger machine with rotating head support.

Concrete base

- Best suited where ground excavation is not permitted.
- The size is adjusted based on the static requirements and location.

Engineered Design

- Model design
- Calculating structural loads and stresses
